

Ali Omar

Software Developer

Ramallah, Palestine | +970 592 870 233 | alidawood098@gmail.com | [LinkedIn](#) | [GitHub](#)

Profile

Full-stack and mobile developer with hands-on experience building production-grade web applications, RESTful APIs, and AI-integrated systems. Completing a dual-studies B.Sc. in Information Technology (final semester) while interning at Palestine Islamic Bank, where I design and maintain business-critical software. Exchange program at Mälardalen University (Sweden) reflects experience collaborating within distributed international teams — **remote-ready** and comfortable working across time zones. Passionate about clean architecture and AI-powered solutions.

Skills

Languages & Frameworks	Python, PHP (Laravel), C# (ASP.NET Core), Dart (Flutter), JavaScript / TypeScript, React
Databases	Oracle Database, SQL Server, MongoDB, Azure Cosmos DB
Cloud & DevOps	Microsoft Azure, Git / GitHub, Docker (basic), CI/CD pipelines
AI & ML	TensorFlow, OpenAI API, Deepgram, ElevenLabs, NLP integration
APIs & Integration	RESTful API design, Twilio Voice SDK, WhatsApp Cloud API, Meta Webhooks
Tools	Supabase, Vite, Tailwind CSS, Trello, Postman, Ngrok

Professional Experience

Palestine Islamic Bank (PIB) <i>IT Intern</i>	<i>01/2023 – Sep. 2026 (Expected)</i> <i>Ramallah, Palestine</i>
- Built and maintained full-stack web applications using Laravel and ASP.NET Core with RESTful API layers serving internal banking portals. - Developed the Connect Hub AI platform — a graduation project that modernised customer-facing communication channels at the bank. - Optimised Oracle and NoSQL databases via query tuning and RMAN backups, reducing data latency by 25%.	

Projects

Connect Hub AI (Graduation Project) <i>Stack: React, TypeScript, Node.js, Python/FastAPI, Twilio, OpenAI, Deepgram, ElevenLabs, Supabase</i>	<i>01/2025 – Present</i>
- Architected a unified multi-channel AI customer-service platform for Palestine Islamic Bank handling WhatsApp messaging and live voice calls via Twilio Voice SDK. - Built a real-time React / TypeScript dashboard (Vite, Tailwind, shadcn/ui) for session monitoring, employee management, and live analytics. - Developed a Python / FastAPI microservice for WhatsApp automation (Meta Webhooks, OTP) and integrated OpenAI NLP, Deepgram STT, and ElevenLabs TTS.	
Trade & Barter Marketplace (Mobile App) <i>Stack: Flutter, Dart, Firebase, Trello</i>	<i>11/2024 – 01/2025</i>
- Built a Flutter peer-to-peer barter app with secure auth, real-time messaging, and location-based listings; reduced search time by 40% and load times by 60% via local caching. - Managed the full lifecycle using Trello for sprint planning across a four-person international team at Mälardalen University (Sweden).	

Education

Al-Quds University <i>B.Sc. Information Technology — Dual Studies (Final Semester)</i>	<i>08/2022 – Sep. 2026 (Expected)</i> <i>Abu Dis, Palestine</i>
Mälardalen University <i>Exchange Program in Computer Science</i>	<i>08/2024 – 01/2025</i> <i>Västerås, Sweden</i>
